

Scott Wang

Senior Software Engineer | Frontend & Full-Stack

Ottawa, ON | scottwang@gmail.com | [LinkedIn](#) | github.com/scottascott | scottascott.github.io

SUMMARY

Senior Software Engineer with 8+ years of experience building production frontend and full-stack applications, specializing in React, Next.js and TypeScript. Experienced in fintech and cryptocurrency platforms spanning real-time trading, payments, digital wallets, KYC/KYB and compliance. Strong focus on scalable architecture, performance, maintainability and production reliability.

TECHNICAL SKILLS

Core Development	TypeScript, React, Next.js, Node.js
Data & Communication	Prisma, Redis, SQL/NoSQL, WebSocket, tRPC, RESTful APIs
Infrastructure & Tools	AWS, CI/CD Pipelines, Git
Domain Expertise	Fintech & Cryptocurrencies, Payment Gateway Integration, Digital Wallets, KYC/KYB Compliance

PROFESSIONAL EXPERIENCE

VirgoCX | Senior Frontend Developer

Dec 2021 - Sep 2026 | Toronto, ON

- Led frontend development across production fintech products spanning cryptocurrency trading, B2B payments, digital wallets and wealth management using React, Next.js and TypeScript.
- Built real-time trading experiences with WebSocket and TradingView, including live market data, order books, interactive charts, trading workflows and portfolio tracking.
- Developed wallet and payment experiences covering deposits, withdrawals, transaction history, address management and real-time asset valuation.
- Integrated internal and third-party services for authentication, KYC/KYB, payments, notifications and compliance, including transaction risk monitoring and manual review workflows.
- Built data-driven Next.js applications with SSR and dynamic SEO, and contributed to shared frontend architecture, backend integrations, Redis caching, CI/CD and AWS deployment.

Wuhan Duofen Art School | Full-Stack Developer

Jan 2016 - May 2017 | Wuhan, China

- Developed a full-stack education platform supporting online courses, school content, tutoring schedules, forums and student services.
- Built responsive web interfaces and Node.js / Express backend services, designing RESTful APIs for content, scheduling, contact and application workflows.
- Integrated WordPress for content management while extending the platform with custom frontend and backend functionality.
- Built a hybrid Android application with PhoneGap and implemented SEO, analytics, email delivery and user engagement features.

PwC | Senior Software Engineer

Nov 2013 - Nov 2015 | Shanghai, China

- Developed enterprise reporting and internal business applications for clients in the insurance and financial services sectors.
- Built data processing and reporting solutions integrating enterprise databases, Excel-based data sources and ETL workflows.
- Developed internal management and analytics tools using Java, Informatica PowerCenter and Tableau, supporting operational reporting and business decision-making.

EDUCATION

University of Ottawa | M.Sc. in Computer Science

Sep 2017 - Sep 2020

Shanghai Jiao Tong University | B.Eng. in Computer Software Engineering

Sep 2010 - Jul 2014

Career chronology: Graduate studies at the University of Ottawa followed the Wuhan Duofen role and preceded VirgoCX.
